

# JOIN *Jr. Stream Watch*

## GET INVOLVED WITH RESTORATION!

We're looking for teens ages 13-18 to gain experience with:

### *Habitat Protection*

Go out into the field and perform hands-on restoration work including vegetation protection, monitoring of popular recreation sites, planting of native species, and installation of restoration infrastructure.

### *Peer-to-Peer Education*

Interact with the public through educational booths and peer-to-peer efforts to help share information about critical habitat and natural resources that people enjoy every year. Topics include fisheries, salmon lifecycles, ethical angling practices, and ecological systems.

### *Plenty of Time Outdoors*

Join us on plenty of outdoor adventures and time on the water. Helping to protect aquatic ecosystems will help you gain experiences with wading, hiking, and boating around the beautiful scenery the Kenai Peninsula has to offer.
